STANDARD FEATURES

AP-Touch™
Cemen Tech’s proprietary, advanced one-touch control system. Simply select the mix design you need and the system auto adjusts to the correct mix. Pre-load unlimited mix designs so you’re always ready for any job.

Auto-Stow™
Easy to lower and raise chute. This additional safety measure means you’re traveling with a safely secured chute.

Auto-Washout™
Quickly wash out on the job site to prevent material build up.

High & Low Flow Admix Tank with Digital Flow Meters
Operator control is simplified with automated admix tanks to ensure the exact amount of admixture is used every time.

Two-Speed Cement Bin
Adjustable cement discharge allows an operator to easily switch between concrete mixers and flowable fill applications.

Sand, Stone & Cement Bin Vibrators
Ensure materials are delivered at a consistent rate with pre-programmed, auto-adjustable vibrators.

Dual Auger Cement Metering
Take the guesswork out of pouring with consistent mix designs within +/- 1 percent every time.

Pump Master Auger with IBS Bearing
A homogeneous mixing auger in the industry for higher discharge height than standard dual mix section augers with an internal bearing system pre-loaded with oil for extended life.

Work Platform
Put safety first with a large work platform to ensure cement is properly and safely loaded.

360° Swivel
Swivel chute makes concrete finishing easier by changing the flow of concrete in any direction.

OPTIONS

More options available — contact your Cemen Tech sales representative for details.

Color System
Need color? No problem! A hopper provides the ability to introduce color pigments into concrete for multiple applications.

Wireless Remote
Operators can move about the job site while maintaining control of the mixer.

2-Yard Extension
Want to carry more yards per trip? Extend the aggregate bin by 2 cubic yards for maximum capacity.

Ticket Printer
Generate a custom batch ticket for your customer.

Additional Admix Systems
Add another admix system for mix designs requiring more than two admixes per job.

Electronic Tarp
Secure aggregates during transit with a high-quality, UV resistant black mesh tarp.

Strobe Lights
Brighten up your work sites and create awareness for traffic around you with bright amber strobe lights.

Spray-In Bin Liner
Get extra protection and seal the inside of the aggregate bin with a heavy duty polyurea protective coating.

Automated Gates
Reduce operator error — aggregate gates self adjust to the required height based on selected mix design.
