PRESS RELEASE

Cemen Tech Expands North American Dealer Network

Major new dealer partnerships in the U.S. open up new territories to high-quality volumetric concrete equipment and expertise.

Indianola, Iowa. August 1st, 2019: [Cemen Tech](#), the global leader in volumetric concrete mixing, has announced agreements with two major construction equipment dealerships in the U.S. to sell and service the company's full line of volumetric concrete mixing equipment. The new dealers are:

- [Komatsu Equipment Company](#) — 11 locations in Nevada, Utah and Wyoming
- [Reynolds-Warren Equipment Company](#) — Two locations in Georgia

“The demand for direct control over concrete scheduling, quality and quantity, is growing as more customers understand the practical benefits of volumetric concrete mixing,” says Connor Deering, CEO/President of Cemen Tech. “Each of these new partnerships represents regional demand and a connection to established businesses serving road and bridge construction, transportation, and industrial and commercial construction — all large-scale markets benefiting from volumetric concrete mixing.”

Reynolds-Warren serves Georgia, a state benefiting from increasing levels of infrastructure investment and overall growth. The dealership specializes in asphalt and roadbuilding equipment — a natural fit for Cemen Tech.

“Concrete plays a critical role in Georgia’s growing transportation infrastructure — we see a great opportunity for customers to optimize their concrete operations, especially in maintenance/repair operations and local roadwork,” says Dan Dwyer, vice president, Reynolds-Warren.

Nevada, Utah and Wyoming each fit the current mold of growing western states with steady construction demand and job growth, and Komatsu Equipment Company serves all major construction markets in the region.

“We see large-scale deployments of this technology benefiting our larger construction, governmental and industrial customers, while providing other customers serving more specific markets such as landscaping

and utility construction new ways to serve clients and grow their business,” says Joel Cook, Vice-President of Sales, Komatsu Equipment Company.

To find a Cemen Tech dealer, and for more information on the company's line of volumetric concrete production solutions, visit www.CemenTech.com or www.ACCU-POUR.com.
