For immediate release:

ACCU-POUR™ hits milestone of 500,000+ cubic yards of concrete poured through the software platform.

Cemen Tech's proprietary suite of concrete productivity tools, ACCU-POUR™, continues to be adopted by users to connect their office, dispatch and fleet in real-time.

Indianola, Iowa. February 22, 2022: This next generation technology has over 500,000 cubic yards of concrete poured through volumetric concrete mixers in only 2 ½ years in the field. The growing adoption of more contractors using Cemen Tech's ACCU-POUR™ aligns with the expanding use of volumetric concrete mixers across the country.

"Every day, volumetric mixers are pouring concrete but very few are using modern technology to run their business. At our core, Cemen Tech is a technology company and we are leading the way in adding smart technology to the volumetric concrete industry," said Connor Deering, Cemen Tech CEO & President.

"Downtime and waste is a killer for most businesses. That is why we offer technology to help reduce both – less downtime with your equipment and more accurate tracking of your materials," continued Deering. "Our technology products surround you and your fleet of volumetric mixers with vital resources to keep you moving and keep your business as profitable as possible."

Office and Mobile software, two major components of ACCU-POUR, connect your office, dispatch, and volumetric mixer fleet in real-time. ACCU-POUR is compatible with any volumetric mixer and helps you blend the big picture with everyday details. ACCU-POUR tracks every yard of concrete poured and gives you immediate access to your production data allowing you to make proactive decisions based on actual and current company data. Gain complete control of your business through ACCU-POUR™ Mobile and Office.

For more information, visit [ACCU-POUR™](#) or schedule an ACCU-POUR [demo](#).

###

About Cemen Tech Inc.

Cemen Tech, Inc. has 53 years manufacturing and engineering experience in the volumetric mixing industry. As the industry leader, the company strives to provide the highest quality concrete mixers to its customers. Cemen Tech currently operates in over 70 countries, services mixers across the globe, and supplies equipment to the United States military. Cemen Tech believes that people, businesses, and communities around the world should have the infrastructure to access clean water, to transport goods and services, and to obtain reliable housing. Their products provide the foundation and stability to meet the needs of a growing world in an environmentally conscious way. www.CemenTech.com

Pictures to include with release

The screenshot shows the ACCU-POUR MOBILE app interface. At the top, it displays the time (2:52 PM), date (Fri Jan 4), and battery level (60%). The user is identified as Dylan Truck 1. The main section is titled "Job #1060_1 Details" and is marked as "COMPLETED". Below this, there are several rows of data organized into columns. The first row shows "MIXER START" at 9:41 PM, "MIXER END" at 9:41 PM, "YARDS POURED" as 0.09, and "ESTIMATED YARDS" as 10. The second row shows "MIX DESIGN" as 3000, "SAND USED" as 103.93, "STONE USED" as 179.52, and "CEMENT USED" as 53.45. The third row shows "WATER USED" as 2.82, "ADMIX 1 USED" as 1, "ADMIX 2 USED" as 14.06, and "ADMIX 3 USED" as 14.06. The fourth row shows "DRY COLOR USED" as 0 and "FIBER USED" as 0. At the bottom, there are two sections: "ORDER INFORMATION" with the name Brooke Eyerly, and "PAYMENT INFORMATION" with the method Cash. A navigation bar at the very bottom contains four buttons: "My Jobs", "Create New Order", "Support", and "Logout".

MIXER START	MIXER END	YARDS POURED	ESTIMATED YARDS
9:41 PM	9:41 PM	0.09	10
MIX DESIGN	SAND USED	STONE USED	CEMENT USED
3000	103.93	179.52	53.45
WATER USED	ADMIX 1 USED	ADMIX 2 USED	ADMIX 3 USED
2.82	1	14.06	14.06
DRY COLOR USED	FIBER USED		
0	0
